Frontier Airlines relies on industry-leading charting solution from Lufthansa Systems

- The US carrier Frontier Airlines opts for Lido mPilot while already relying on Lido FMS
- Lido solutions support airlines in increasing safety and reducing the workload of an entire mission – both on the ground and in the air
- Frontier Airlines is the first low-cost carrier in the Americas region to become a Lido charting customer

Raunheim, 13th June 2023. Lufthansa Systems announced that Frontier Airlines has signed a contract over five years on the use of Lido mPilot. By opting for Lido mPilot while already relying on Lufthansa System's Lido FMS for one and a half years, the US airline gains a reliable and accurate system to achieve maximum operational efficiency, safety, and stability. Frontier Airlines is the first low-cost carrier in the Americas region to become a Lido customer.

Lido mPilot is Lufthansa Systems' all-in-one charting application, offering easy access to terminal charts, a dynamically generated enroute map, an Airport Moving Map (AMM), as well as the required operational documents. The Lido Route Manual terminal charts, forming the basis of Lido mPilot, are meticulously crafted to display aeronautical procedures and information intuitively. Optimized for airline use, Lido mPilot is designed to improve the pilots' situational awareness, so that they can focus on what truly matters: safe and efficient aircraft operations.

"Frontier is pleased to partner with Lufthansa Systems' Lido mPilot for charting systems. The mPilot product has developed substantially in the last several years and provides Frontier with an intuitive and user-friendly product at a significant saving, reinforcing our commitment to 'Low Fares Done Right,'" said Brad Lambert, Vice President of Flight Operations, Frontier Airlines.

"We are proud to strengthen the relationship with our valued customer Frontier Airlines. Their selection of Lufthansa Systems underlines the quality and excellence of our products and services. We are pleased to support Frontier Airlines with our reliable and experienced IT solutions in their charting and navigational needs", added Stefanie Neumann, CEO at Lufthansa Systems.
