BBN Airlines Indonesia signs multi-year agreement for Lido Solutions by Lufthansa Systems

- BBN Airlines Indonesia is Lufthansa Systems' first customer in Indonesia to use their charting solutions
- BBN Airlines Indonesia opted for Lido mPilot and Lido FMS
- Lido solutions were chosen due to their high data quality, world class 24/7 support, and their intuitive user-friendly features

Raunheim, 22nd August 2023. Lufthansa Systems announced that BBN Airlines Indonesia has signed a multiple-year contract to use Lufthansa Systems' charting application, Lido mPilot and Lido Flight Management System (FMS). BBN is Lufthansa Systems' first customer in Indonesia to use their charting solutions. BBN chose the Lido solutions because of their high data quality and their user-friendliness that increases its efficiency.

Providing pilots with all the necessary navigation charts, documents, and messages on their device, Lido mPilot is an all-in-one navigation solution. The Lido charts are generated directly from the certified Lido FMS navigation database and meet the highest standard of precision and quality. The charting standard was developed by navigation experts in collaboration with pilots, licensed dispatchers, and IT specialists. The solution is designed to increase pilots' situational awareness, allowing them to always access flight-relevant information. This way, their attention can be focused on safe and efficient aircraft operations.

Lido FMS is a comprehensive, certified navigation database, containing all relevant aeronautical data with worldwide coverage, including information about airports, airways, waypoints, radio beacons, holding patterns, and approaches. Lido FMS holds EASA Service Provider Certificate Type 1 and is compliant with relevant industry standards such as RTCA DO-200, RTCA DO-201 and ARINC 424.

"With safety being our top priority, we are pleased to be partnering with Lufthansa Systems. With Lido mPilot and Lido FMS they have provided us with two outstanding solutions that maximize safety and operational cost savings," said Captain Wijaya, head of operations at BBN Airlines Indonesia. "Lufthansa Systems' high data quality is what convinced us to opt for Lido solutions and thanks to its user-friendliness we will be able to work more efficiently."

"We are pleased to welcome BBN Airlines Indonesia as a valued customer of Lido mPilot and Lido FMS for their charting and navigational needs, and we look forward to supporting their operational growth with high quality data and services combined with our digital navigational processes and applications," said David Parrish, VP of Sales for Southeast Asia, China and Indochine at Lufthansa Systems.
