GIT IT done – LSY Developer Conference 2024

Raunheim, 17th May 2024. Developer Experience (DX) and Artificial Intelligence were the focus topics of the 3rd LSY Developer Conference to keep attendees informed about the latest trends and cutting-edge technology. About 300 colleagues from the tech community at Lufthansa Systems and across the Lufthansa Group, as well as partners like Google, HashiCorp, Microsoft, and GitHub joined this year's edition in Raunheim on May 15th and 16th 2024. Additionally, more than 200 participants followed the event with the motto "GIT IT done" remotely.

The main objective of the developer conference is to create learning opportunities for software developers, DevOps engineers, UI/UX engineers, software architects, and test engineers and equip them with knowledge and skills that are immediately applicable in their work environment. To achieve this, experts and peers shared their experiences in several keynotes, tech talks, and interactive sessions.

While 15 internal speakers across various departments and business units of the Lufthansa Group shared their developer experience in Tech Talks, guests from leading technology companies brought insights from the forefront of innovation:

- Nic Jackson, HashiCorp, talked about the creation of custom LLMs
- Robin-Manuel Thiel, Microsoft, gave insights into building intelligent AI apps
- Gramoz Krasniqi and Keyvan Sadri, Lufthansa Digital Hangar, showed how to enhance Azure OpenAI and gave insights into digital innovation at Lufthansa
- Andreas Ribbrock, Google, shared insights into cross platform app development with Bernd Rosstauscher from Swiss

„Our developer community is key to our ability to deliver innovation to airlines and the aviation industry. The annual developer conference is our platform to connect and inspire developers across locations and to foster exchange and learning from each other. We have an inspiring agenda with internal speakers from Lufthansa Systems and Lufthansa Group and external speakers from our partners HashiCorp, Microsoft, and Google. We are proud that our developer conference meanwhile developed into an important platform for the Lufthansa Group Tech community," says Dr. Thomas Wittmann, CEO at Lufthansa Systems.
