

A paperless briefing solution – integrated and easy to use

Lido mBriefing

Lido mBriefing is an iOS-based mobile solution that seamlessly integrates with Lido Flight 4D, and is designed to support pilots throughout all flight phases.

Lido mBriefing enables flight crews to access flight-plan relevant information at a glance, even in phases of no or limited connectivity, to accept the flight plan, and to order fuel. The workflow-centric user interface increases accessibility to information and task efficiency, while the split screen functionality, route sharing and quick links for content look-up with Lido mPilot reduce both the workload the human error factor. The content sharing and synchronization functionalities allow for task-sharing and collaborative work.

The integration of Lido mBriefing with Lido Flight 4D ensures a seamless setup, and allows dispatch to understand the briefing status. Push notifications increase awareness about flight plan changes or updates.

Finally, the solution allows the pilots to attach notes, pictures and screenshots to the post flight report.

Key Benefits & Features

Seamless integration

Seamlessly integrated into Lido Flight 4D, Lido Flight 4D Crew Briefing and with Lido mPilot

Downloadable

Download the briefing package and view all documents in offline mode

Always accessible

Inflight access to all briefing information, including the NavLog

Analyze and archive

Ability to submit Nav – and JourneyLogs post-flight for archiving and analysis.

ATC clearances

Document ATC clearances and route changes with preset keywords and supportive functionalities.
