

Let us improve your revenue!

Protect. Secure. Maximize. Your revenue, fully optimized—Simply!

Clean inventory. Increase revenue. *Lufthansa Systems' Revenue Integrity* helps airlines eliminate unproductive bookings that block valuable seat capacity. The result? More seats are available at peak times, inventory costs are reduced, compensation costs are lowered and booking efficiency is increased. Delivered as a flexible SaaS solution, it requires only a standard browser and offers analysts a powerful, user-friendly interface.

Flexible. Smart. Precise. The solution adapts to your needs with real-time, customizable business rules and anti-churning logic. It also has modular features. On-demand reporting and fast rule deployment give you full control to optimize your revenue performance.

Revenue Integrity User Interface

Boost Revenue!

- Detect and remove unproductive or fictitious bookings.
- Reclaim blocked seats and resell them during periods of high demand.

Increase Efficiency.

- Automate booking checks and actions with customizable rules.
- Empower analysts with a user-friendly interface and on-demand reports.

Stay Flexible:

- Scale features as needed with a modular setup.
- Adjust and deploy business rules instantly.
- Reprocess bookings yourself.

Cut Distribution Costs.

- Reduce inventory costs by removing inactive segments.
- Lower overbooking rates to save on compensation fees.
