Lido Route Manual Backup

Enabling smooth and uninterrupted operations

Lido Route Manual Backup

Prepare your operations for unforeseen outages with Lido Route Manual Backup.

Redundant cloud infrastructure ensures uninterrupted operations and the latest updates.

Lido Route Manual Backup offers airlines access to Lido Route Manual charting content, in case of the failure of electronic charting products or backend systems. This backup solution is a suitable alternative available to pilots, completely independent from the regular apps. Terminal charts are conveniently packaged in one- or multi-paper formats.

With just a few clicks, the charts can be downloaded from the Lido Route Manual Backup website, automatically synchronized to a redundant on-site server or directly to pilot devices via the WebDAV protocol.

Always be fully equipped with updated information for your flight with Lido Route Manual Backup.

Key benefits & features

Online interface
- Directly access, view and doenload PDF charts.

WebDAV integration
- Supports differential offline chart access in Windows Explorer and supported iOS applications.

Automatic sychronization
- Ability to sync charts to iOS files application automatically, as well as other data stores or windows folders.

Always accessible
